This Prospectus provides important information about the Fund that you should know before investing. Please read it carefully and keep it for future reference. These securities have not been approved or disapproved by the Securities and Exchange Commission nor has the Securities and Exchange Commission passed upon the accuracy or adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

The Fund is listed on the Chicago Board Options Exchange (“CBOE”) BZX Exchange, Inc.

ANYDRUS ADVANTAGE ETF

Ticker Symbol: NDOW

(a series of the Collaborative Investment Series Trust)

Supplement dated May 24, 2024 to the Prospectus and Statement of Additional Information (“SAI”) dated April 17, 2024.

Effective May 28, 2024, the section in the Fund’s SAI entitled “Timing of Submission of Purchase Orders” is hereby restated as follows:

Timing of Submission of Purchase Orders

An Authorized Participant must submit an irrevocable purchase order no later than the earlier of (i) 4:00 p.m. Eastern Time or (ii) the closing time of the bond markets and/or the trading session on the Exchange, on any Business Day in order to receive that Business Day’s NAV (“Cut-off Time”). The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the “Transmittal Date.” An order to create Creation Units is deemed received on a Business Day if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating custom orders and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve Bank wire system, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the “Settlement Date,” which is generally the Business Day immediately following the Transmittal Date (“T+1”). The Fund reserves the right to settle Creation Unit transactions on a basis other than T+1, including a shorter settlement period, if necessary or appropriate under the circumstances and compliant with applicable law. For transactions shorter than T+1, the Fund will accept transactions between 8:00 a.m. to 9:30 a.m. Eastern time for settlement on that Business Day or between 4:00 p.m. and 5 p.m. Eastern day on the prior Business Day.

You should read this Supplement in conjunction with the Prospectus and SAI dated April 17, 2024 for the Fund, which provides information that you should know about the Funds before investing and should be retained for future references. These documents are available upon request and without charge by calling (877) 694-3532.

FUND SUMMARY: ANYDRUS ADVANTAGE ETF

Investment Objectives: The Anydrus Advantage ETF (the “Fund”) seeks to provide total return, consisting of capital appreciation and income.

Fees and Expenses of the Fund: This table describes the fees and expenses, excluding any brokerage fees, that you may pay if you buy, sell, and hold shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.**

Annual Fund Operating Expenses <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	1.25%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.60%
Acquired Fund Fees and Expenses ⁽²⁾	0.25%
Total Annual Fund Operating Expenses	2.10%
Fee Waiver and Reimbursement ⁽³⁾	0.00%
Total Annual Fund Operating Expenses After Fee Waiver	2.10%

(1) Other expenses are estimated for the current fiscal year.

(2) Acquired Fund Fees and Expenses, which are estimated for the Fund’s current fiscal year, are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

(3) The adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through July 31, 2025 to ensure that Net Annual Fund Operating Expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, or (vii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the advisor)) will not exceed 1.85%. Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund’s expenses and boost its performance. This expense limitation agreement may be terminated at any time, by the Board upon sixty days written notice to the adviser.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$213	\$658

PORTFOLIO TURNOVER: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, may adversely affect the Fund’s performance. The Fund does not have any portfolio turnover because it has not yet launched.

PRINCIPAL INVESTMENT STRATEGIES:

The Fund is an actively managed exchange traded fund (“ETF”) that seeks to achieve its investment objective by investing in a combination of equity securities, fixed income securities and ETFs (“Underlying Funds”) representing a broad range of asset classes. The Fund seeks to provide attractive risk adjusted returns over market cycles by investing in a broadly diversified portfolio. In doing so, the Fund seeks to provide investors with 1) reduced correlation to U.S. only stock and bond market movements, and 2) multiple alternative return sources that are independent from traditional U.S. stock and bond markets. A complementary strategy to holding a diverse asset-based portfolio is the fund manager's use of opportunistic selection of individual securities to hold within the selected asset class mix.

The Underlying Funds in which the Fund invests each primarily invest in (1) equity securities of domestic, foreign, and emerging market issuers, (2) U.S. fixed income securities, (3) real estate investment trusts, (4) master-limited partnerships, (5) agency and mortgage-backed securities, (6) managed futures contracts or (7) physical commodities. The Fund may also invest in money market funds depending on market conditions. Underlying Funds that invest in equity securities may do so without regard to market capitalization and may invest in American Depositary Receipts (“ADRs”). Fixed income Underlying Funds may invest fixed income securities of any maturity or credit quality including non-investment grade fixed income securities, commonly known as “high yield” or “junk” bonds that are rated below Baa3 by Moody’s Investors Service or similarly by another rating agency.

The Fund may also invest directly in individual equity securities without regard to capitalization and individual bonds from issuers of any credit quality or maturity, including high yield or “junk” bonds. The Fund considers an emerging market country to include any country that is (1) generally recognized to be an emerging market country by the

international financial community, including the World Bank; (2) classified by the United Nations as a developing country; or (3) included in the MSCI Emerging Markets Index.

The Fund has flexibility to invest in a broad range of equity, fixed income and alternative asset classes in the U.S. and other markets throughout the world. The Fund’s adviser invests the Fund’s assets, either directly or through Underlying Funds, in accordance with the following investment exposure ranges:

Equity Securities	30% to 70%
Fixed Income Securities	30% to 70%
Alternative Assets	0% to 30%
Cash/Money Market Funds	0% to 30%

The adviser utilizes rules-based, quantitative systems combined with discretionary analysis to measure market risk and selects the underlying assets to buy and sell for the Fund. The Fund’s investment adviser will manage the Fund’s portfolio using an investment process that analyzes fundamental, market-related, technical and statistical attributes of eligible securities to assess total return potential.

The Fund may hedge up to 10% of its portfolio by investing in futures contracts on equity indexes, U.S. and foreign sovereign bonds, commodities or volatility indexes.

Through these actions, the Adviser seeks to provide favorable returns relative to standard benchmarks on both an absolute total return as well as on a risk-adjusted return basis.

PRINCIPAL RISKS: As with all ETFs, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund’s net asset value (“NAV”) and performance.

Allocation Risk. Investments in the Fund are subject to risks related to the Adviser’s allocation choices. The selection of the assets could cause the Fund to lose value or its results lag relevant benchmarks or other funds with similar objectives.

Asset-Backed and Mortgage-Backed Securities Risk. When the Fund invests in asset-backed securities and mortgage-backed securities, the Fund is subject to the risk that, if the underlying borrowers fail to pay interest or repay principal, the assets backing these securities may not be sufficient to support payments on the securities.

Cash and Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.

Commodities Risk. Investing in the commodities markets may subject the Fund to greater volatility than investments in traditional securities. Commodity prices may be influenced

by various external factors such as unfavorable weather, animal and plant disease, geologic and environmental factors as well as changes in government regulation such as tariffs, embargoes or burdensome production rules and restrictions.

Futures Risk. Investment in futures contracts involves leverage which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectations and may not produce the desired results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index or reference asset because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they may be based. The adviser's use of futures for hedging purposes may not work as intended, resulting in losses for the Fund. The use of futures for hedging purposes may also limit potential gains for the Fund when compared to unhedged funds.

Investments in futures contracts are subject to the volatility of the markets in which they trade. Prices of commodities, currencies, and financial instruments can fluctuate widely due to factors like changes in interest rates, exchange rates, government policies, and supply and demand dynamics. The futures markets are subject to comprehensive regulation. Changes in regulations or their enforcement could impact the strategies used by managed futures ETFs, potentially affecting performance. Managed futures strategies depend on a range of operational processes, including order execution, settlement, and clearing. Failures in these processes can result in unexpected losses.

Emerging Markets Risk. Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems with fewer security holder rights. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid. Due to this relative lack of liquidity, the Fund may have to accept a lower price or may not be able to sell a portfolio security at all. There may be less reliable or publicly available information about emerging markets due to non-uniform regulatory, auditing or financial recordkeeping standards (including material limits on Public Company Accounting Oversight Board ("PCAOB") inspection, investigation and enforcement), which could cause errors in the implementation of the Fund's investment strategy.

ETF Structure Risk. The Fund is structured as an ETF and as a result is subject to the special risks, including:

- The market prices of shares will fluctuate in response to changes in NAV and supply and demand for shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that shares may trade at a discount to NAV.
- In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's NAV.

- In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's NAV.
- When all or a portion of an ETF's underlying securities trade in a market that is closed when the market for the shares is open, there may be changes from the last quote of the closed market and the quote from the Fund's domestic trading day, which could lead to differences between the market value of the shares and the Fund's NAV.

Exchange Traded Funds Risk. The cost of investing in the Fund will be higher than the cost of investing directly in the ETFs in which it invests and may be higher than other mutual funds that invest directly in stocks and bonds. Each other ETF is subject to specific risks, depending on the nature of the ETF.

Fixed Income Risk. Typically, a rise in interest rates causes a decline in the value of fixed income securities. In general, the market price of fixed income securities with longer maturities will decrease more in response to rising interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by an American Underlying Fund or Other Underlying Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). Current conditions have resulted in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by an American Underlying Fund or Other Underlying Fund. As a result, for the present, interest rate risk may be heightened.

Below Investment Grade Securities Risk. Although bonds rated below investment grade (also known as "junk" securities) generally pay higher rates of interest than investment grade bonds, bonds rated below investment grade are higher risk, which may result in loss of income and principal.

Foreign Risk. Investing in notes of foreign issuers involves risks not typically associated with U.S. investments, including adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards.

Large Capitalization Stock Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities market.

Management Risk. The portfolio manager's judgments about the attractiveness, value and potential appreciation of particular stocks or other securities in which the Fund invests may

prove to be incorrect and there is no guarantee that the portfolio manager's judgment will produce the desired results.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects.

Master-Limited Partnership (MLP) Risk. Investments in MLPs involve risks different from those of investing in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP or MLP-related security, risks related to potential conflicts of interest between an MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's limited call right. MLPs and MLP-related securities are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns.

Money Market Risk. The Fund's investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Certain money market funds seek to preserve the value of their shares at \$1.00 per share, although there can be no assurance that they will do so, and it is possible to lose money by investing in such a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause the share price of such a money market fund to fall below \$1.00. Other money market funds price and transact at a "floating" NAV that will fluctuate along with changes in the market-based value of fund assets. Shares sold utilizing a floating NAV may be worth more or less than their original purchase price. Recent changes in the regulation of money market funds may affect the operations and structures of money market funds.

Real Estate Investment Trust (REIT) Risk. The value of securities issued by a REIT may be affected by changes in the value of the underlying property owned by the REITs and the value of mortgage REITs may be affected by the quality of loan assets. Investment in REITs involves risks similar to those associated with investing in small capitalization companies, and REITs (especially mortgage REITs) are subject to interest rate risks. Because REITs incur expenses like management fees, investments in REITs also add an additional layer of expenses.

Small and Medium Capitalization Stock Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally

have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

Performance: Since the Fund has not yet launched, the performance section is omitted. In the future, performance information will be presented in this section of this Prospectus. Also, shareholder reports containing financial and performance information will be mailed to shareholders semi-annually.

Investment Adviser: Collaborative Fund Advisors, LLC

Investment Sub-Adviser: Retireful, LLC

Portfolio Managers: Garrett Smith and William Sutherland have each served as the Fund’s portfolio manager since the Fund’s inception in May, 2024. Each portfolio manager is primarily and jointly responsible for the day-to-day management of the Fund’s portfolio.

Purchase and Sale of Fund Shares: The Fund will issue and redeem shares at NAV only in large blocks of 25,000 shares (each block of Shares is called a “Creation Unit”). Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units, the shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on CBOE BZX Exchange, Inc. (the “Exchange”) and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-free plan. If you are investing through a tax free plan, you will be taxed upon withdrawal from your account.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

INVESTMENT OBJECTIVES

Fund	Investment Objective
Anydrus Advantage ETF	The Fund seeks to provide total return, consisting of capital appreciation and income.

The Fund's investment objective may be changed by the Collaborative Investment Series Trust (the "Trust") board of trustees (the "Board") upon 60 days' written notice to shareholders.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange traded fund ("ETF") that seeks to achieve its investment objective by investing in a combination of equity securities and ETFs ("Underlying Funds") representing a broad range of asset classes. The Underlying Funds in which the Fund invests each primarily invest in (1) equity securities of domestic, foreign and emerging market issuers, (2) U.S. fixed income securities, (3) real estate investment trusts, (4) master-limited partnerships, (5) agency and mortgage-backed securities, and (6) managed futures contracts. The Fund may also invest in money market funds depending on market conditions. Underlying Funds that invest in equity securities may do so without regard to market capitalization and may invest in American Depositary Receipts ("ADRs"). Fixed income Underlying Funds may invest in non-investment grade fixed income securities, commonly known as "high yield" or "junk" bonds that are rated below Baa3 by Moody's Investors Service or similarly by another rating agency.

The Fund may invest in individual equity securities without regard to capitalization and individual bonds from issuers of any credit quality or maturity, including high yield or "junk" bonds. The adviser considers an emerging market country to include any country that is (1) generally recognized to be an emerging market country by the international financial community, including the World Bank; (2) classified by the United Nations as a developing country; or (3) included in the MSCI Emerging Markets Index.

The Fund has flexibility to invest in a broad range of equity, fixed income and alternative asset classes in the U.S. and other markets throughout the world. The Fund's adviser invests the Fund's assets, either directly or through Underlying Funds, in accordance with the following investment exposure ranges:

Equity Securities	30% to 70%
Fixed Income Securities	30% to 70%
Alternative Assets	0% to 30%
Cash/Money Market Funds	0% to 30%

The adviser utilizes rules-based, quantitative systems combined with discretionary analysis to measure market risk and selects the underlying assets to buy and sell for the Fund. The Fund's investment adviser will manage the Fund's portfolio using an investment process that analyzes fundamental, market-related, technical and statistical attributes of eligible securities to assess total return potential.

The Fund may hedge up to 10% of its portfolio by investing in futures contracts on equity indexes, U.S. and foreign sovereign bonds, commodities or volatility indexes.

PRINCIPAL INVESTMENT RISKS

The following describes the risks born by the Fund with respect to its investments.

Allocation Risk. Investments in the Fund are subject to risks related to the Adviser's allocation choices. The selection of the assets could cause the Fund to lose value or its results lag relevant benchmarks or other funds with similar objectives.

Asset-Backed and Mortgage-Backed Securities Risk. Prepayment risk is associated with mortgage-backed and asset-backed securities. If interest rates fall, the underlying debt may be repaid ahead of schedule, reducing the value of the Fund's investments. If interest rates rise, there may be fewer prepayments, which would cause the average bond maturity to rise, increasing the potential for the Fund to lose money. The value of these securities may be significantly affected by changes in interest rates, the market's perception of issuers, and the creditworthiness of the parties involved. The ability of the Fund to successfully utilize these instruments may depend on the ability of the Fund's adviser to forecast interest rates and other economic factors correctly. These securities may have a structure that makes their reaction to interest rate changes and other factors difficult to predict, making their value highly volatile. Certain mortgage-backed securities may be secured by pools of mortgages on single-family, multi-family properties, as well as commercial properties. Similarly, asset backed securities may be secured by pools of loans, such as student loans, automobile loans and credit card receivables. The credit risk on such securities is affected by homeowners or borrowers defaulting on their loans. The values of assets underlying mortgage-backed and asset-backed securities may decline and, therefore, may not be adequate to cover underlying investors. Mortgage-backed securities and other securities issued by participants in housing and commercial real estate finance, as well as other real estate-related markets have experienced extraordinary weakness and volatility in recent years. Possible legislation in the area of residential mortgages, credit cards and other loans that may collateralize the securities in which the Fund may invest could negatively impact the value of the Fund's investments. To the extent the Fund focuses its investments in particular types of mortgage-backed or asset-backed securities, the Fund may be more susceptible to risk factors affecting such types of securities.

Cash and Cash Equivalents Risk. At any time, the Fund may have significant investments in cash or cash equivalents. When a substantial portion of a portfolio is held in cash or cash equivalents, there is the risk that the value of the cash account, including interest, will not keep pace with inflation, thus reducing purchasing power over time.

Commodities Risk. The Fund's exposure to the commodities futures markets may subject the Fund to greater volatility and less liquid than investments in traditional securities. The

value of commodity-linked derivative instruments, commodity-based notes, and other derivative instruments that provide exposure to the investment returns of the commodities markets may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments.

Futures Risk. Investment in futures contracts involves leverage which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the adviser's expectations and may not produce the desired results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index or reference asset because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they may be based. The adviser's use of futures for hedging purposes may not work as intended, resulting in losses for the Fund. The use of futures for hedging purposes may also limit potential gains for the Fund when compared to unhedged funds.

Investments in futures contracts are subject to the volatility of the markets in which they trade. Prices of commodities, currencies, and financial instruments can fluctuate widely due to factors like changes in interest rates, exchange rates, government policies, and supply and demand dynamics. The futures markets are subject to comprehensive regulation. Changes in regulations or their enforcement could impact the strategies used by managed futures ETFs, potentially affecting performance. Managed futures strategies depend on a range of operational processes, including order execution, settlement, and clearing. Failures in these processes can result in unexpected losses.

Emerging Markets Risk. In addition to the risks generally associated with investing in securities of foreign companies, countries with emerging markets also may have relatively unstable governments, social and legal systems that do not protect shareholders, economies based on only a few industries, and securities markets that trade a small number of issues. In addition, emerging securities markets may have different clearance and settlement procedures, which may be unable to keep pace with the volume of securities transactions or otherwise make it difficult to engage in such transactions.

ETF Structure Risk. The Fund is structured as an ETF and as a result is subject to the special risks, including:

- The market prices of the Fund's shares will fluctuate in response to changes in net asset value ("NAV") and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
- In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and a Fund's NAV.

- In stressed market conditions, the market for the Fund’s shares may become less liquid in response to the deteriorating liquidity of the Fund’s portfolio. This adverse effect on the liquidity of a Fund’s shares may, in turn, lead to differences between the market value of a Fund’s shares and a Fund’s NAV.
- When all or a portion of an ETF’s underlying securities trade in a market that is closed when the market for the shares is open, there may be changes from the last quote of the closed market and the quote from the Fund’s domestic trading day, which could lead to differences between the market value of the shares and the Fund’s NAV.

Exchange Traded Funds Risk. The cost of investing in the Fund will be higher than the cost of investing directly in the ETFs in which it invests and may be higher than other mutual funds that invest directly in stocks and bonds. Each other ETF is subject to specific risks, depending on the nature of the ETF.

Fixed Income Risk. Typically, a rise in interest rates causes a decline in the value of fixed income securities. In general, the market price of fixed income securities with longer maturities will decrease more in response to rising interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by an American Underlying Fund or Other Underlying Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). Current conditions have resulted in a rise in interest rates, which in turn may result in a decline in the value of the fixed income investments held by an American Underlying Fund or Other Underlying Fund. As a result, for the present, interest rate risk may be heightened.

Below Investment Grade Securities Risk. Although bonds rated below investment grade (also known as “junk” securities) generally pay higher rates of interest than investment grade bonds, bonds rated below investment grade are higher risk, which may result in loss of income and principal.

Foreign Risk. Foreign investing involves risks not typically associated with U.S. investments, including adverse fluctuations in foreign currency values, adverse political, social and economic developments, less liquidity, greater volatility, less developed or less efficient trading markets, political instability and differing auditing and legal standards. Investing in emerging markets imposes risks different from, or greater than, risks of investing in foreign developed countries.

Large Capitalization Stock Risk. Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large capitalization companies has trailed the overall performance of the broader securities market.

Management Risk. The Adviser's assessment of the attractiveness and potential appreciation of particular investments or markets in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser's investment strategy will produce the desired results.

Market and Geopolitical Risk. The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment. Therefore, the Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns.

Master-Limited Partnership (MLP) Risk. Investments in MLPs involve risks different from those of investing in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP or MLP-related security, risks related to potential conflicts of interest between an MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's limited call right. MLPs and MLP-related securities are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns.

MLPs, typically, do not pay U.S. federal income tax at the partnership level. Instead, each partner is allocated a share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law or in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in such MLP being required to pay U.S. federal income tax on its taxable income. The classification of an MLP as a corporation for U.S. federal income tax purposes would have the effect of reducing the amount of cash available for distribution by the MLP. Thus, if any of the MLPs owned by the Fund were treated as corporations for U.S. federal income tax purposes, it could result in a reduction of the value of your investment in the Fund and lower income, as compared to an MLP that is not taxed as a corporation. If the Fund holds an MLP until its cost basis for tax purposes is reduced to zero, subsequent distributions received by the Fund will be taxed at ordinary income rates and shareholders may receive a corrected Form 1099.

Money Market Risk. The Fund's investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Certain money market funds seek to preserve the value of their shares at \$1.00 per share, although

there can be no assurance that they will do so, and it is possible to lose money by investing in such a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause the share price of such a money market fund to fall below \$1.00. Other money market funds price and transact at a “floating” NAV that will fluctuate along with changes in the market-based value of fund assets. Shares sold utilizing a floating NAV may be worth more or less than their original purchase price. Recent changes in the regulation of money market funds may affect the operations and structures of money market funds.

Real Estate Investment Trust (REIT) Risk. Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs may be affected by changes in the value of the underlying property owned by the REITs and mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, and are subject to heavy cash flow dependency, default by borrowers and self-liquidation. REITs also are subject to the possibilities of failing to qualify for tax free pass-through of income under the Internal Revenue Code and failing to maintain their exemption from registration under the Investment Company Act of 1940. Investment in REITs involves risks similar to those associated with investing in small capitalization companies, and REITs (especially mortgage REITs) are subject to interest rate risks. When interest rates decline, the value of a REIT’s investment in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT’s investment in fixed rate obligations can be expected to decline. Because REITs incur expenses like management fees, investments in REITs also add an additional layer of expenses.

Small and Medium Capitalization Stock Risk. The earnings and prospects of small and medium sized companies are more volatile than larger companies and may experience higher failure rates than larger companies. Small and medium sized companies normally have a lower trading volume than larger companies, which may tend to make their market price fall more disproportionately than larger companies in response to selling pressures and may have limited markets, product lines, or financial resources and lack management experience.

Temporary Investments: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, and U.S. Government securities. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure: A description of the Fund's policies and regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAP").

Cybersecurity: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact a Fund's business operations, potentially resulting in financial losses; interference with a Fund's ability to calculate its NAV; impediments to trading; the inability of a Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for a Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT OF THE FUND

INVESTMENT ADVISER

Collaborative Fund Advisors, LLC, located at 500 Damonte Ranch Pkwy, Bldg 700, Unit 700, Reno, NV 89521, serves as investment adviser to the Fund. Subject to the authority

of the Board, the Adviser is responsible for management of the Fund's portfolio. The Adviser is responsible for assuring the Fund's investments are managed according to its investment objective, policies, and restrictions. Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser (the "Investment Advisory Agreement"), the Fund pays the Adviser, on a monthly basis, an annual advisory fee of 1.25% of its average daily net assets.

The Adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through July 31, 2025 to ensure that net annual fund operating expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses), (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, or (vii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the advisor)) will not exceed 1.85%. Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance. This expense limitation agreement may be terminated at any time, by the Board upon sixty days written notice to the Adviser.

INVESTMENT SUB-ADVISER

Retireful, LLC, located at 120 N. Washington, Suite 300, Lansing, MI 48933, serves as investment sub-adviser to the Fund. Subject to the authority and oversight of the Board of Trustees and the Adviser, the Sub-Adviser is responsible for the trade execution management of the Fund's investment portfolio. Pursuant to a sub-advisory agreement between the Adviser and the Sub-Adviser, the Sub-Adviser is entitled to receive from the Adviser (not the Fund), on a monthly basis, an annual advisory fee equal to 0.15% of the Fund's net assets.

A discussion regarding the basis for the Board's approval of the Advisory Agreement and Sub-Advisory Agreement will be available in the Fund's first annual or semi-annual shareholder report.

PORTFOLIO MANAGERS

Garrett Smith

Garrett Smith has been a portfolio manager with the Adviser since 2024 and with Belpointe Asset Management, LLC since 2020. Prior to joining Belpointe Asset Management, LLC, Dr. Smith was a financial advisor with MassMutual Financial Group from 2017 to 2020. Dr. Smith is also an Associate Professor of Finance at the University of Wisconsin – Whitewater since 2022.

William Sutherland

William Sutherland has been a portfolio manager with the Adviser since 2024 and with Belpointe Asset Management, LLC since 2020. Prior to joining Belpointe Asset Management, LLC, Mr. Sutherland was a financial advisor with MassMutual Financial Group from 2013 to 2020.

The Fund's SAI provides additional information about the portfolio managers' compensation structure, other accounts managed by each portfolio manager, and the portfolio managers' ownership of Fund shares.

NET ASSET VALUE

The NAV and offering price (NAV plus any applicable sales charges) of each class of shares is determined as of the close of the Chicago Board Options Exchange BZX Exchange, Inc. (normally 4:00 p.m. Eastern Time) on each day the Exchange is open for business (the "Valuation Time"). NAV is computed by determining, on a per class basis, the aggregate market value of all assets of a Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Holiday, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of a Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

The Fund's securities or other investment assets for which market quotations are readily available will be valued at current market value based upon such market quotations as of the Valuation Time. The Fund may use independent pricing agents to provide current market values. Generally, a Fund's securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith and evaluated as to the reliability of the fair value method used by the Board on a quarterly basis, in accordance with procedures approved by the Board. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to the Adviser. The team may also enlist third party consultants such as an audit firm or financial officer

of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of a Fund's securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for a Fund. The Fund may invest in foreign securities that are primarily listed on foreign exchanges that may trade on weekends or other days when the Fund does not price its shares, the value of a Fund's portfolio may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the Exchange. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the securities will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using a Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of a Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of a Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value or the price that may be realized upon the actual sale of the security.

With respect to any portion of a Fund's assets that are invested in one or more open-end management investment companies that are registered under the 1940 Act, a Fund's net asset value is calculated based upon the net asset values of the registered open-end management investment companies in which the Fund invests, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

Premium/Discount Information

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers at market prices and the Fund's Shares will trade at market prices. The market price of Shares of the Fund may be greater than, equal to, or less than NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares of the Fund.

Information regarding how often the Shares of the Fund traded at a price above (at a premium to) or below (at a discount to) the NAV of the Fund during the past four calendar quarters, when available, can be found at www.anydrusfunds.com.

HOW TO BUY AND SELL SHARES

Shares of the Fund will be listed for trading on the Exchange under the symbol NDOW.

Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth Holiday, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized Participants that have entered into contracts with a Fund's distributor may acquire Shares directly from a Fund, and Authorized Participants may tender their Shares for redemption directly to a Fund, at NAV per Share only in large blocks, or Creation Units, of 25,000 shares. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

Share Trading Prices

The approximate value of Shares of the Fund, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares of the Fund and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated Tape Association. This approximate value should not be viewed as a "real-time" update of the NAV per Share of the Fund because the approximate value may not take into account certain Fund expenses and may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Fund does not make any warranty as to the accuracy of these values.

Book Entry

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same

as those that apply to any other securities that you hold in book entry or “street name” form.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund’s Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants who have entered into agreements with a Fund’s distributor. The vast majority of trading in a Fund’s Shares occurs on the secondary market. Since the secondary market trades do not directly involve a Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in a Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with a Fund, to the extent effected in-kind (*i.e.*, for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objective. However, direct trading by Authorized Participants is critical to ensuring that a Fund’s Shares trade at or close to NAV. The Fund also employs fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund imposes transaction fees on purchases and redemptions of Fund Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that a Fund’s trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of a Fund’s Shares.

DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES

Unlike interests in conventional mutual funds, which typically are bought and sold from and to the fund only at closing NAVs, the Fund’s Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day’s next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on a Fund’s portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares’ in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid annually by a Fund. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional Shares if the broker through whom you purchased Shares makes such an option available.

Taxes

As with any investment, you should consider how your investment in Shares will be taxed.

The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

Taxes on Distributions

As stated above, dividends from net investment income, if any, ordinarily are declared and paid annually by the Fund. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. Distributions from a Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that a Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Fund shares at the rate for net capital gain. A part of a Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations – the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations – subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund (if that option is available). Distributions reinvested in additional Shares of the Fund through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund is required to withhold up to 30% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

Taxes on Exchange-Listed Share Sales

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

Taxes on Purchase and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An Authorized Participant that exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the securities. The Internal Revenue Service ("Service"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales" or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See "Tax Status" in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and a Fund's obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in a Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See "TAX STATUS" in the SAI for more information.

FUND SERVICE PROVIDERS

Collaborative Fund Services, LLC serves as the Trust's administrator, which has its principal office at 500 Damonte Ranch Parkway, Building 700, Unit 700, Reno, NV 89521.

Citi Fund Services Ohio, Inc. is the Fund's administrator and fund accountant. It has its principal office at 4400 Easton Commons, Suite 200, Columbus, OH 43219, and is primarily in the business of providing administrative, fund accounting and regulatory filing services to retail and institutional mutual funds.

Citibank, N.A., is the Fund’s custodian. It has its principal office at 388 Greenwich Street, New York, NY 10048.

Paralel Distributors, LLC (the “Distributor”), located at 1700 Broadway Suite 1850, Denver, CO 80290, is the distributor for the shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. (“FINRA”).

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, OH 43215, serves as legal counsel to the Trust.

Cohen and Company, Ltd., located at 342 North Water Street, Suite 830, Milwaukee, WI 53202 serves as the Fund’s independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

OTHER INFORMATION

Continuous Offering

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a “distribution,” as such term is used in the Securities Act of 1933, as amended (the “Securities Act”), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not underwriters but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption

provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

FINANCIAL HIGHLIGHTS

Because the Fund has only recently commenced investment operations, no financial highlights are available for the Fund at this time. In the future, financial highlights will be presented in this section of the Prospectus.

PRIVACY NOTICE

Collaborative Investment Series Trust

Rev. November 2017

FACTS	WHAT DOES COLLABORATIVE INVESTMENT SERIES TRUST DO WITH YOUR PERSONAL INFORMATION?
--------------	-------------------------------------------------------------------------------------------

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
-------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

What?	The types of personal information we collect and share depends on the product or service that you have with us. This information can include: <ul style="list-style-type: none"> Social Security number and wire transfer instructions account transactions and transaction history investment experience and purchase history When you are <i>no longer</i> our customer, we continue to share your information as described in this notice.
--------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Collaborative Investment Series Trust chooses to share; and whether you can limit this sharing.
-------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Reasons we can share your personal information:	Does Collaborative Investment Series Trust share information?	Can you limit this sharing?
For our everyday business purposes - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	YES	NO
